Summary

Technical Program and Product Manager with 2+ years of experience delivering AI products and large-scale data programs. Brings a strong technical foundation, hands-on execution, and cross-functional leadership. Seeking a Technical Program Manager role to turn technical goals into customer-facing products at scale.

Experience

Apple (via INSPYR)

Apr 2026 - Present

Technical Program Management

Cupertino, CA

- Led cross-functional execution of a multilingual AI data collection program spanning **500K+ ML assets, 150+ batches, and 2 external vendors**; managed priorities, dependencies, QA capacity, and quality risks to support engineering development.
- Drove day-to-day execution through daily vendor reviews and weekly leadership updates, tracking milestones, surfacing blockers, and aligning cross-functional teams on QA protocol changes to mitigate delivery risks.
- Reconciled **350K+ asset records** across vendor sources, QA records, and batch reports **within one month**, providing stakeholders with a validated view of program health.
- Reduced manual QA review volume by **30%** by identifying duplicate vendor assets as a recurring bottleneck and partnering with a cross-regional technical team to implement an **LLM-powered deduplication workflow**.

AI Data Operations & User Research

- Conducted **100+ user research sessions**, including Wizard-of-Oz studies, usability tests and Voice-of-Customer interviews to surface gap between current products and user needs.
- Owned **end-to-end operations** for multilingual user studies, partnering with engineering teams and external vendors to coordinate scheduling, configure environments, and validate data for completeness and accuracy.

Product Manager Accelerator

July 2026 – Present

AI Product Manager

Remote

- Led the **0-to-1 development of PMA Apply**, an AI-powered job application agent, owning product strategy, MVP scoping, PRDs, success metrics, and UI/UX.
- Partnered with the engineering lead to convert the roadmap into a prioritized Linear backlog, coordinate ticket ownership, track milestones and dependencies, and keep the launch on schedule.

EchoLab | Pre-Seed

Aug 2025 – Mar 2026

Founding AI Product Manager

San Francisco, CA

- Led cross-functional 0-to-1 delivery of a **GenAI experimentation platform**, translating interviews with 10 early adopters into requirements for an agentic RAG workflow and AI evaluation framework; delivered the MVP in **4 months**, reducing experiment setup time by **85%** and increasing capacity by **5×**.

211 LA

Jun 2024 – Aug 2024

Product Manager/MLE Intern

Los Angeles, CA

- Drove delivery of a **conversational AI referral assistant** from discovery through solution design, identifying target users and pain points through data analysis, stakeholder interviews, and call-recording reviews; designed a RAG-based architecture projected to reduce call handling time by **32%** and increase caller satisfaction by **11%**.

Education

University of Southern California, MS in Computer Science - Applied Data Science

Aug 2023 - May 2025

Shanghai Jiao Tong University, BS in Electrical and Computer Engineering

Sept 2019 – Aug 2023

SKILLS

Project Management & Business: Technical Program Management, Scoping, Roadmapping, Prioritization, Risk Management, Resource Planning, Stakeholder Management, SDLC, Agile Delivery, Cross-functional collaboration

Engineering & Tools: Python, SQL, REST APIs, AWS, GCP, Git, Linear, Excel, AI Agent(Claude Code), LLMs
